Jump Math!

Our Virtual Math program is an individualized tutoring program for students aged 8-14 who are performing a minimum of one year behind in the area of math due to a diagnosed, identified, or suspected math disability (dyscalculia), and who are showing signs of math anxiety.

JUMP Math is a structured intervention program developed by Dr. John Mighton, an award-winning mathematician, playwright and best-selling author, who funded JUMP Math (Jumpmath.org)

Participants work in small groups (4) with a trained numeracy tutor to build foundational math skills and computational fluency. Sessions are taught using a combination of direct instruction and engaging math games and activities. Participants are also able to set goals and visualize their progress throughout the program in order to foster math confidence.
